EXPERIENCE

Frontend Engineer Axios Jul 2021 – Present

- Engineered reader-engagement analytics and wysiwyg editor solutions using JavaScript ES6+, TypeScript, React, Tailwind CSS, Tiptap/ProseMirror and RESTful API integrations.
- Collaborated with design, product, and engineering to deliver compelling user-facing solutions based on client expectations and stakeholder needs.
- Engineered the front-end for Comments, which enabled users to intuitively collaborate within the platform.
- Built Smart Brevity Assistant, a writing assistant which increased newsletter effectiveness by 72%.
- Engineered New User Onboarding, which helped reduce the time users took to send their first newsletters by 67%.
- Consistently drove our engineering culture forward with highly tested, performant TypeScript.

Frontend Engineer

Trazi Ventures

Oct 2020 - Jul 2021

- Engineered using a variety of different languages, frameworks, and content management systems such as HTML5, CSS3, Sass, PHP, JavaScript, React, Vue, Nuxt, Netlify CMS, etc.
- Leveraged HTML, CSS/Sass, and vanilla JavaScript to build Report Search, which helped users find their reports efficiently based on client-specific filters.
- Constructed app's report dashboard using Vue and Nuxt, improving data visualization for 10 million records.
- · Consistently met Agile team sprint goals.
- Achieved 100% code test coverage for Vue components using Jest and Vue Testing Library.

Frontend Engineer

Carroll Bradford

Dec 2019 - Oct 2020

- Interfaced with product and stakeholders to develop and redesign the company's app using JavaScript, Vue, Bootstrap, and Sass.
- Led initiative to redesign and build the frontend for the project and CRM dashboard, the main systems responsible for generating \$11 million in project revenue in 2020.
- Automated end-to-end testing using Selenium, improving testing code coverage from 0 to 85%.
- Led the creation and building of app's UI/UX Design System, utilizing Adobe XD and Figma.
- Rewrote all Sass files to adopt the BEM naming convention to reinforce engineering standards.
- Implemented app's documentation page, which streamlined the developer onboarding process.

Frontend Developer

Freelance | Britojs

Jun 2016 - Aug 2019

- Develop, design, create, and test response mobile/desktop web applications for multiple clients using HTML, CSS, JavaScript and React.
- Implemented regular site performance improvements using Google Lighthouse tool.
- Engineered childcare company's website using React and Next.js, improving Search Engine Optimization (SEO) and generating \$5,000 in new revenue each month.
- Improved accessibility for music artist's website from 30% to 100% by following WCAG international standards.

EDUCATION

University of South Carolina

Fall 2017 – May 2019

B.S. in Business Administration

• Cumulative GPA: 3.6; Honors: Magna Cum Laude.

PROJECTS

- **Spotify Connect.** Developed a web app that visualizes personalized Spotify data such as top artists, tracks, and playlists. React, JavaScript, TypeScript, Tailwind CSS, Express.js, Node.js.
- **BlogNLP.** AI blog writing tool using OpenAI's GPT-3. Generated over 4,000 users in its launch month across 80+ countries. Next.js, TypeScript, Tailwind CSS, OpenAI's GPT-3 Davinci model
